

Imagine That!

The Imaging (X-Ray) Department
at Lincoln Medical Center has
NEW State-of-the-Art Equipment

GE Light Speed CT Scanner

- ✓ Provides State-of-the-Art 3-D imaging resources.
- ✓ Produces clearer images, while providing the least amount of radiation.
- ✓ Scans the total body in 38 seconds, which is important when caring for children and patients that are anxious about having tests.

Nuclear Medicine Camera

- ✓ A non-invasive method of imaging the bones, organs, and tissue structures within the body.
- ✓ The finest method for detecting early signs of heart, lung, liver, thyroid, bone or kidney disease, small tumors, or even infections.
- ✓ The amount of radiation received from a nuclear medicine scan is very low - about the same as for a single chest X-ray.
